8. Exposure controls/personal protection

8.1 Control parameters.

The product contain substances with Professional Exposure Environmental Limit Values.

Phosphoric acid : STEL: 3 mg/m³ (Worksafe Aust.)

A time weighted average (TWA) has been established for Phosphoric acid (Safe Work Australia) of 1 mg/m³. The corresponding STEL level is 3 mg/m³. The STEL (Short Term Exposure Limit) is an exposure value that should not be exceeded for more than 15 minutes and should not be repeated for more than 4 times per day. There should be at least 60 minutes between successive exposures at the STEL. The exposure value at the TWA is the average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5 day working week.

The product does NOT contain substances with Biological Limit Values.

8.2 Exposure controls.
